Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-22 and 31-39, drawn to a printing press cylinder and a method for installing a cylinder in a printing press, classified in class 101, subclass 483.

II. Claims 23-30 drawn to a method for forming a cylinder in a printing press, classified in class 29, subclass 895.

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of Group II which includes the steps of forming first and second profiles on an outer surface of a first hub or forming a bore adapted for engaging the shaft of a printing has different modes of operation, different functions, or different effects from the structure and the method of Group I, and would have different effects on the structure and the steps of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2854

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
